### Algonquin College Hosts Fourth Computer Programming Olympics for High School Students

1385 Woodroffe Avenue

Ottawa, Ontario

Canada

K2G 1V8

The Computer Studies Department in Algonquin College's School of Advanced Technology is hosting its fourth Computer Programming Olympics. This year's contest theme is *CSI Algonquin: Case of the Phantom*. The contest is open to Ottawa-area high school students who register and qualify within a four-week preliminary phase that ended on April 27, solving a series of computer problems in an attempt to locate "The Phantom" by decoding sound files with cryptic clues. Qualifying teams are invited for a final day event at Algonquin College on Saturday, May 12, where students will compete for valuable prizes and medals with enhanced programming problems. The winning teams will receive their awards at a closing ceremony presentation.
